All Georgia physicians, laboratories, and other health care providers are required by law to report patients with conditions of public health concern listed on the reverse of the enclosed form 3095. Both lab-confirmed and clinical diagnoses are reportable within the time intervals specified.

Reporting enables appropriate public health follow-up for your patients, helps identify outbreaks, and provides a better understanding of disease trends in Georgia. For the latest information from the DHR, Division of Public Health, visit their website at: www.health.state.ga.us.
**PATIENT DEMOGRAPHICS**

**Patient's Name**
- Last Name
- First Name
- MI

**Patient's Address**
- Street
- City
- State
- Zip+4
- County

**CLINICAL INFORMATION**

- **Illness Onset Date**
- **Hospitalized**
- **Emergency Rm**
- **Outpatient**
- **Died?**
- **Date of Death:**

**LABORATORY INFORMATION**

- **Specimen Collection Date**
- **Test Name**
- **Specimen Type**
- **Result**
- **Species / Serotype**
- **Lab Name**

**ADDITIONAL INFORMATION**

- **Pregnant**
- **Nursing Home or other**
- **Chronic Care Facility**
- **Child In Daycare**
- **Daycare Worker**
- **Prisoner/Detainee**
- **Food Handler**
- **Health Care Worker**
- **Outbreak/Related**
- **Travel in Last 4 Weeks**

**REPORTER INFORMATION**

- **Report Date**
- **Reporter Name**
- **Report Institution**
- **Physician Name**
- **Physician Phone**

- **Comments/Symptoms/Treatment:**
- **Local Use Only**
- **State Use Only**
- **Additional form completed**
REPORT IMMEDIATELY

- any cluster of illnesses
- animal bites
- anthrax
- all acute arboviral infections:
  - Eastern Equine Encephalitis (EEE)
  - LaCrosse Encephalitis (LAC)
  - St. Louis Encephalitis (SLE)
  - West Nile Virus (WNV)
- botulism
- brucellosis
- cholera
- diphtheria
- E. coli O157:H7
- Haemophilus influenzae (invasive)*
- hantavirus pulmonary syndrome
- hemolytic uremic syndrome (HUS)
- hepatitis A (acute)
- measles (rubeola)
- meningitis (specify agent)
- meningococcal disease
- pertussis
- plague
- poliomyelitis
- Q fever
- rabies (human & animal)
- severe acute respiratory syndrome (SARS)
- shiga toxin positive tests
- S. aureus with vancomycin MIC ≥ 4μg/ml
- smallpox
- syphilis (congenital & adult)
- tuberculosis
- latent TB infection, under age 5
- tularemia

REPORT WITHIN 7 DAYS

- AIDS (see below, to report)
- aseptic meningitis
- campylobacteriosis
- chancroid
- Chlamydia trachomatis (genital infection)
- Creutzfeldt-Jakob Disease (CJD), suspected cases, under age 55
- cryptosporidiosis
- cyclosporiasis
- ehrlichiosis
- giardiasis
- gonorrhea
- HIV (see below, to report)
- hearing impairment (permanent, under age 5)*
- hepatitis B
  - acute hepatitis B
  - newly identified HBsAg+ carriers**
  - HBsAg+ pregnant women
- hepatitis C virus infection (past or present)
- influenza associated death (under age 18)
- lead blood level ≥ 10μg/dL
- legionellosis
- leptospirosis
- listeriosis***
- Lyme disease
- lymphogranuloma venereum
- malaria
- methicillin-resistant S. aureus
  - (community-associated)*
- mumps
- psittacosis
- Rocky Mountain spotted fever
- rubella (including congenital)
- salmonellosis
- shigellosis
- streptococcal disease, Group A or B (invasive)*
- Streptococcus pneumoniae (invasive)*
  - report with antibiotic-resistance information
- tetanus
- toxic shock syndrome
- toxoplasmosis
- typhoid
- Vibrio infections
- yersiniosis

REPORT WITHIN 1 MONTH

- birth defects†
- maternal death‡
- (Report electronically or call Maternal & Child Health Epidemiology Section, 404-657-6448)

REPORT WITHIN 4-6 MONTHS

- benign brain and central nervous system tumors
- cancer
- (Refer to the web site http://health.state.ga.us/programs/gccr/reporting.asp)

Poster Key

- Potential agent of bioterrorism.
- Invasive = isolated from blood, bone, CSF, joint, pericardial fluid, peritoneal fluid, or pleural fluid.
- † Hearing impairment is reportable to the Children 1st Program (http://health.state.ga.us/epi/disease/hearing.asp).
- ** HBsAg+ = hepatitis B surface antigen positive.
- *** L. monocytogenes isolated from any site. Infant mortality is reportable to Vital Records.
- †† Resulting in severe illness or death
- †‡ Birth defects are reportable to the Georgia Birth Defects Reporting and Information System (http://health.state.ga.us/epi/disease/birthdefects.asp).
